

## Audit report

The following table comprises the 3 groups most affected by disparate outcomes. Disparate outcomes are defined by equalized odds and groups are ranked based on confidence (of the disparity).

group size	group condition	disparity magnitude	disparity confidence
3186 / 51.62 %	race in {African_American, Native_American};	0.232	0
3175 / 51.44 %	race in {African_American};	0.230	0
2103 / 34.07 %	race in {Caucasian};	0.147	0
