

## Audit report

The following table comprises the 3 groups most affected by disparate outcomes. Disparate outcomes are defined by equalized odds and groups are ranked based on confidence (of the disparity).

Visualizations of trees that generated the groups are provided on the following pages.

group size	group condition	disparity magnitude	disparity confidence
3186 / 51.62 %	race in {African_American, Native_American};	0.232	0
3175 / 51.44 %	race in {African_American};	0.230	0
2103 / 34.07 %	race in {Caucasian};	0.147	0
